

TECHNOLOGY AREA TEMPLATE

DEFINITION

<i>Name</i>	Spyware Removal
<i>Description</i>	Tools used for removing spyware. Spyware is defined as: a general term for a program that surreptitiously monitors your actions. While they are sometimes sinister, like a remote control program used by a hacker, software companies have been known to use spyware to gather data about customers. The practice is generally frowned upon.
<i>Rationale</i>	To minimize the risk of exposure of a client's private information. To protect the states information and resources from outside abuse or attack.
<i>Benefits</i>	Demonstrates the state is taking steps to minimize the risk of exposing private and state information. Computers and networks run faster if they don't have spyware installed on them.
